

## **CLARIFICATION FOR AVALON HOMEOWNERS IN THE NORTH END**

### **SOUTH JERSEY GAS INSTALLATION OF MAINS AND LATERALS**

Those who will be impacted have already been notified by South Jersey Gas. It may be helpful to clarify the sequence of installation.

- 1 There will be no interruption of service with the main pipe installation.
2. Only when the lateral work is scheduled will there be egress to properties. No gas shut offs will be done in cold weather. However, when warmer weather returns South Jersey Gas may arbitrarily do the lateral replacements if they have not heard from the property owner. You do not have to have the lateral replacement scheduled in the winter months and the service will not be interrupted.
